HEATSMART PRESENTATION ON ENERGY EFFICIENT HOME HEATING

Being warm in the winter and cool in the summer is a big part of our quality-of-life. **HeatSmart** can help show you how to increase your comfort and take advantage of tax credits and incentives available now. Home heating and hot water account, on average, for 75% of the total energy use in Tompkins County homes. HeatSmart Tompkins promotes affordable, energy efficient ways to heat and cool homes through using air- and ground-source heat pumps in combination with improvements in insulation and air sealing. Learn more and talk to vetted installers here in Trumansburg on:

October 9 from 6:30-8:30 at the Trumansburg Fire Hall, 74 W. Main St. Trumansburg.

Tour homes using these systems in the Trumansburg/Ulysses area

Saturday, Oct. 13th 10-noon

3406 Gorge Road
Trumansburg, NY
air source heat/cooling system.

Saturday, Oct. 13th 2pm-4pm

4124 Reynolds Rd.
Trumansburg Fire Hall, Trumansburg, NY
domestic hot water air source **heat pump** and a ground source **heat pump** with fan coil cooling

With heating needs in winter, cooling and dehumidification needs in summer, home comfort requires control over air temperature. Heat pumps are a tremendous advance because they can heat, cool, and dehumidify your home with great energy and cost efficiency. Heat pumps work at all temperatures and unlike oil, propane or natural gas heaters, they do all those things with minimal environmental impacts. If you power them with renewable energy, they provide a personal path to a zero-carbon home.
